Sprint 2: HealthWebsite Team 36

Edison Aviles
Jason Ledon
Mukundh Balajee

Project Background

Project Purpose :

● Create an app for fitness and health enthusiast to record and visualize their project while also finding information about local gyms and potentially pairing with other users who share similar health related interests to chat or meet for a gym session!

Sprint 2 Goals

- Improve UI design for most/all pages a user would be interacting with
- Incorporate dynamic graphing based on user inputted data
- Have a basic Google Maps API feature
- Update models

Short Website Demo

Difficulties

- Learning and debugging the Google Maps API
- Mapping user data to specific dates
- Booth

Final Demo Goals

- Working Google Maps feature with the ability to locate other users nearby for the gym buddy feature
- Updated UI and Personal Profiles
- Chatting feature
